- { } encloses superfluous signs in the original.
- encloses signs reported (in publications, etc.) but not actually given, or not available to the editor-
 - reperates distinct sections of unrelated text here
 //
 - parallel (text).

The purpose of this work is simple: to make available the principal texts of the Cameroide are (g.1300-1070 MC) is a compact and accurate edition that about he comprehensive but hardy to use. For sings other than ophenoral, a consistent but flexible order of naterial has been adopted; foreign affairs (sup. dated), then internal affairs (dated documents, special topics or groups), then groupsphical series north to south, then minor remains, other documents (e.g., pappri), and royal family. Monuments of nontemporaries are ranged in 25 basic categories which are standard throughout these volumes. Citation of this work should be as ESI, by volume, page and line.

Text-presentation was given much prior thought, Whenever possible, horizontally-written tests are given to their original grouping and orientation. The same applies to vertical texts, except that their solumns are transposed to the Soricontal plane, Texts are given as in the originals, i.e. generally continuous, not with modern centence-division. These procedures sice from severely practical considerations. First, a reversed text is doubly hard to college scourately. Escond, sentencedivision is oubjective in some classes of text, and mis-division can be misleading (s.g., JEA 19,226f., on Drk.IV,1287,20f.), Third, such division often entails much waste space - the 7000 or 3000 pages of this work rould soon become 9000 with so gain. Fourth, scholars and atodests alike should accustom themselves to reading texts in their real form, and to making their own analysis of linguistic/literary structure, not as dirtated by an milior. On restorations, restraint is deliberate, as major restorations are frequently conjectural and by their presence can close the wind to alternatives; they belong better to translations with commmotarise. Factual corrigeria are welcome, and will be imperporated in volumes IT-VII as appropriate.

This project has been underway for some 30 years since its modert, beginnings, and sylidesteadors to others and gratitude for help afforded are wide-ranging, and a pleasure to acknowledge. Through award of the T.S. Fest Travelling Scine to 1962/63 and support from the Joint Committee on Research then and later, the University of Liverpool made possible a vast amount of fieldwork in Egypt. In 1970, an award from the Dir Ernest Cassell Trust facilitated a specially valuable meason in Euger.

Access to outlying sites is a benefit owed to accompanying Sile signations of Messrs. Bales, Fairways & Swinford (1963/64), and especial Swans (1964fr.). Other costs of travel, recording, etc., were to be undersigned. Technical assistance I owe to Messrs. D. Birch with Dimmock (Faculty Photographic Service) for all edition-negatives, to likewise my thanks to Dr. W.J. Martin and Mr. A.R. Millard succession Department of Hebrew & Ancient Semitic Studies, for their courtery of granting electric typing facilities.

On the academic plane, some acknowledgement is already included rubrice within this volume. First and foremost, my thanks go to the authorities of the Egyptian Antiquities Service and Museum at all lefrom its directorate (currently under Dr. Gamal Moukhtar) to the look Inspectors, for their willing help these past 15 years. Outside ign thanks go to the British Museum (T.G.H. James, with formerly Dr. L.D. Edwards and (Professor) A.F. Shore), to the Brooklyn Museum (S.Y. ica Professor R.A. Caminos, the Griffith Institute (Miss H. Murray, In) Malek), the Musée du Louvre (the late J. Vandier; Mme C. Desroches-le court), the trustees of the Metropolitan Museum of Art, New York, the Carleberg Glyptothek, Copenhagen (M. Jørgensen), and the University eum, Philadelphia (D. O'Connor, L. Bell) and Oriental Institute, 200 with Chicago House, Luxor (G.R. Hughes, C.F. Nime, colleagues and see sors). Most especial thanks go to Professor H.W. Fairman and the Let Exploration Society for their generous permission to use Amaral Visit pre-publication, and to Professor J. Vercoutter for bis signal ista with texts from Aksha and esp. Sai, And to Dr. L. Habachi for inch kindness and self-sacrifice over data for the Bethos-stelke of los

In publication, my debt is twofold, Professor W. Helek most graduset aside his project in favour of mine; his BiOr reviews are involved but without the kindly interest of Bir Basil Blackwell in asserted cation, this whole project would doubtless never have survived, Jeroby the support of his staff, his continued interest has been a staff couragement. It is fitting, therefore, that this first complete the should record warm appreciation of that interest in its dedication
